EDUCATION

CMR University

B.Tech - Computer Science & Engineering | 2025-2029
Second-year undergraduate.

IIT Madras

BS - Data Science & Applications | 2026-2030
Pursuing alongside the B.Tech programme.

TECHNICAL TOOLKIT

Languages
Python, Dart, JavaScript, TypeScript, C/C++

Application
Flutter, Next.js, React, FastAPI, Flask

AI & Data
TensorFlow, XGBoost, Scikit-learn, Pandas, Plotly

Engineering
REST APIs, Git/GitHub, Firebase, Linux, SQL

Foundations
DSA, OOP, Computer Vision, Model Evaluation

PROBLEM SOLVING

LeetCode - 135 solved

Codeforces - 959 rating

GitHub - 34 repositories

leetcode.com/u/BezaleelPaulN
codeforces.com/profile/BezaleelPaulN2228

CREATIVE PRACTICE

Guitar & music production
Electric guitar; REAPER, Waveform, LMMS; VST instruments/effects; recording and sound design.

PROFILE

Second-year Computer Science undergraduate at CMR University, also pursuing the BS in Data Science and Applications at IIT Madras. Focused on applied AI and software engineering: building practical applications, exploring explainable machine learning, and turning technical ideas into usable products.

EXPERIENCE & LEADERSHIP

Software Development Intern | Eazy Walkers Digital

India | Sep 2026-Present
Contributing to software development work in a professional team environment.

Former EXCOM Member & Webmaster Volunteer

IEEE CMR University Student Branch | Dec 2025-Sep 2026
Maintained student-branch web experiences with Next.js and modern frontend tooling; supported its digital presence.

Team Lead | Drishti-AI (SIH 2026 software prototype)

Leading a multidisciplinary explainable-AI prototype for diabetic-retinopathy screening; coordinating model, safety, clinical-workflow and Flutter application workstreams.

SELECTED PROJECTS

Drishti-AI - Explainable Retinal Screening

Python, TensorFlow, Flutter, Computer Vision, XAI
Fundus quality assessment, DR grading, model evidence and clinician-in-the-loop review in a Smart India Hackathon prototype.
PORTFOLIO ENTRY SOURCE REPOSITORY

Orbital Observatory - 3D Keplerian Engine

Next.js, TypeScript, React Three Fiber, Three.js
Interactive planetarium with a custom Keplerian solver, procedural planetary data and multiple camera modes.
PORTFOLIO ENTRY SOURCE REPOSITORY

Mise - File Organizer & Disk Intelligence

Flutter, Dart, Python, Cross-platform
Local-first file organizer focused on selective undo, duplicate analysis and safer file-organization workflows.
PORTFOLIO ENTRY SOURCE REPOSITORY

NADICARE Twin Engine

Python, XGBoost, Streamlit, Plotly
Healthcare digital-twin prototype for physiological response and recovery modeling with interactive telemetry.
PORTFOLIO ENTRY SOURCE REPOSITORY
