BEZALEEL PAUL N

COMPUTER SCIENCE · APPLIED AI · SOFTWARE ENGINEERING

Bengaluru, India | +91 78923 47356 | bezaleel321@gmail.com
linkedin.com/in/bezaleel-pauln | github.com/BezaleelPaul | bezaleel-paul-portfolio.vercel.app

EDUCATION

CMR University
B.Tech · Computer Science & Engineering | 2025–2029
Second-year undergraduate.

IIT Madras
BS · Data Science & Applications | 2026–2030
Pursuing alongside the B.Tech programme.

TECHNICAL TOOLKIT

Languages
Python · Dart · JavaScript · TypeScript · C/C++

Application
Flutter · Next.js · React · FastAPI · Flask

AI & data
TensorFlow · XGBoost · Scikit-learn · Pandas · Plotly

Engineering
REST APIs · Git/GitHub · Firebase · Linux · SQL

Foundations
DSA · OOP · Computer Vision · Model Evaluation

PROBLEM SOLVING

LeetCode · 135 solved

Codeforces · 959 rating

GitHub · 34 repositories

leetcode.com/u/BezaleelPaulN · codeforces.com/profile/BezaleelPaulN2228

CREATIVE PRACTICE

Guitar & music production

Electric guitar · REAPER · Waveform · LMMS · VST instruments and effects. Exploring composition, recording and sound design.

PROFILE

Second-year Computer Science undergraduate at CMR University, also pursuing the BS in Data Science and Applications at IIT Madras. Focused on applied AI and software engineering: building practical applications, exploring explainable machine learning, and turning technical ideas into usable products. Interested in software engineering internships where strong fundamentals and thoughtful implementation matter.

EXPERIENCE & LEADERSHIP

Software Development Intern · Eazy Walkers Digital
India · Sep 2026–Present
- Contributing to software development work in a professional team environment.

Former EXCOM Member & Webmaster Volunteer · IEEE CMR University Student Branch
Bengaluru · Dec 2025–Sep 2026
- Maintained and developed student-branch web experiences using Next.js and modern frontend tooling.
- Supported the branch's digital presence and technical community activities.

Team Lead · Drishti-AI (SIH 2026 software prototype)
2026
- Leading a multidisciplinary team developing an explainable-AI prototype for diabetic-retinopathy screening.
- Coordinating model, safety, clinical-workflow and Flutter application workstreams.

SELECTED PROJECTS

Drishti-AI — Explainable Retinal Screening
Python · TensorFlow · Flutter · Computer Vision · Explainable AI
- Smart India Hackathon prototype exploring fundus-image quality assessment, DR grading, model evidence and clinician-in-the-loop review.

Portfolio entry · Source

Orbital Observatory — 3D Keplerian Engine
Next.js · TypeScript · React Three Fiber · Three.js
- Interactive digital planetarium with a custom Keplerian orbital solver, procedural planetary data and multiple camera modes.

Portfolio entry · Source

Mise — File Organizer & Disk Intelligence
Flutter · Dart · Python · Cross-platform
- Local-first file organizer and disk utility focused on selective undo, duplicate analysis and safer file workflows.

Portfolio entry · Source

NADICARE Twin Engine
Python · XGBoost · Streamlit · Plotly
- Healthcare-focused digital-twin prototype for physiological response and recovery modeling with interactive telemetry.

Portfolio entry · Source
