EDUCATION

B.Tech, Computer Science & Engineering
CMR University
2025 – 2029 · Second year

BS, Data Science & Applications
IIT Madras
2026 – 2030 · In progress

TECHNICAL TOOLKIT

Languages
Python · Dart · JavaScript · TypeScript · C / C++

Application
Flutter · Next.js · React · FastAPI · Flask

AI / Data
TensorFlow · XGBoost · Scikit-learn · Pandas · Plotly

Engineering
REST APIs · Git / GitHub · Firebase · Linux · SQL

Foundations
Data Structures & Algorithms · OOP · Computer Vision · Model Evaluation

CERTIFICATIONS

- AI Apps with Gemini & Imagen — Google (Apr 2026)
- Data Analytics with Python — NPTEL (67/100, 2026)
- Claude Code in Action — Anthropic (Mar 2026)
- Flutter Software Training — CMR University (Feb 2026)

CREATIVE PRACTICE

Music production & guitar
Electric guitar · REAPER · Waveform · LMMS · VST instruments & effects

- Exploring composition, recording, sound design, and digital audio production alongside software engineering.

PROGRAMMING PRACTICE

Problem-solving snapshot
GitHub: 34 repositories · LeetCode: 135 solved · Codeforces: 959 rating

BEZALEEL PAUL N

COMPUTER SCIENCE UNDERGRADUATE | APPLIED AI & SOFTWARE ENGINEERING

Second-year Computer Science undergraduate at CMR University, also pursuing the BS in Data Science and Applications at IIT Madras. Focused on applied AI and software engineering: building practical applications, exploring explainable machine learning, and turning technical ideas into usable products. Interested in software engineering internships where strong fundamentals, thoughtful implementation, and continuous learning matter.

SELECTED ENGINEERING PROJECTS

Drishti-AI — Explainable Retinal Screening

Python · TensorFlow · Flutter · Computer Vision · Explainable AI

Drishti-AI — Explainable Retinal Screening

Source repository ■

- Leading a Smart India Hackathon software prototype for explainable diabetic-retinopathy screening.
- Explores fundus-image quality assessment, DR grading, model evidence, and clinician-in-the-loop review.

Orbital Observatory — 3D Keplerian Engine

Next.js · TypeScript · React Three Fiber · Three.js

Orbital Observatory — 3D Keplerian Engine

Live project ■

Source repository ■

- Interactive digital planetarium with a custom Keplerian orbital solver and procedural planetary data.
- Includes multiple camera modes and optional NASA open-data context.

Mise — File Organizer & Disk Intelligence

Flutter · Dart · Python · Cross-platform

Mise — File Organizer & Disk Intelligence

Source repository ■

- Local-first cross-platform file organizer and disk utility for desktop and mobile.
- Focuses on selective undo, duplicate analysis, and safer file-organization workflows.

NADICARE Twin Engine

Python · XGBoost · Streamlit · Plotly

NADICARE Twin Engine

Source repository ■

- Healthcare-focused digital-twin prototype for physiological response and recovery modeling.
- Combines predictive modeling with interactive telemetry visualizations.

EXPERIENCE & LEADERSHIP

Software Development Intern — Eazy Walkers Digital

India · Sep 2026 – Present

- Contributing to software development work in a professional team environment.

Former EXCOM Member & Webmaster Volunteer — IEEE CMR University Student Branch

Bengaluru · Dec 2025 – Sep 2026

- Maintained and developed student-branch web experiences using Next.js and modern frontend tooling.
- Supported the branch's digital presence and technical community activities.

Team Lead — Drishti-AI — Smart India Hackathon 2026 · Software Prototype

India · 2026

- Leading a multidisciplinary team developing an explainable-AI prototype for diabetic-retinopathy screening.
- Coordinating model, safety, clinical-workflow, and Flutter application workstreams.

ADDITIONAL

- Open to Software Engineering / Applied AI Internships

Interests: applied AI, product engineering, interactive 3D systems and music technology.

PROJECT ARCHIVE
